

Visão geral — médias por métrica (Random Forest vs Logistic Regression)

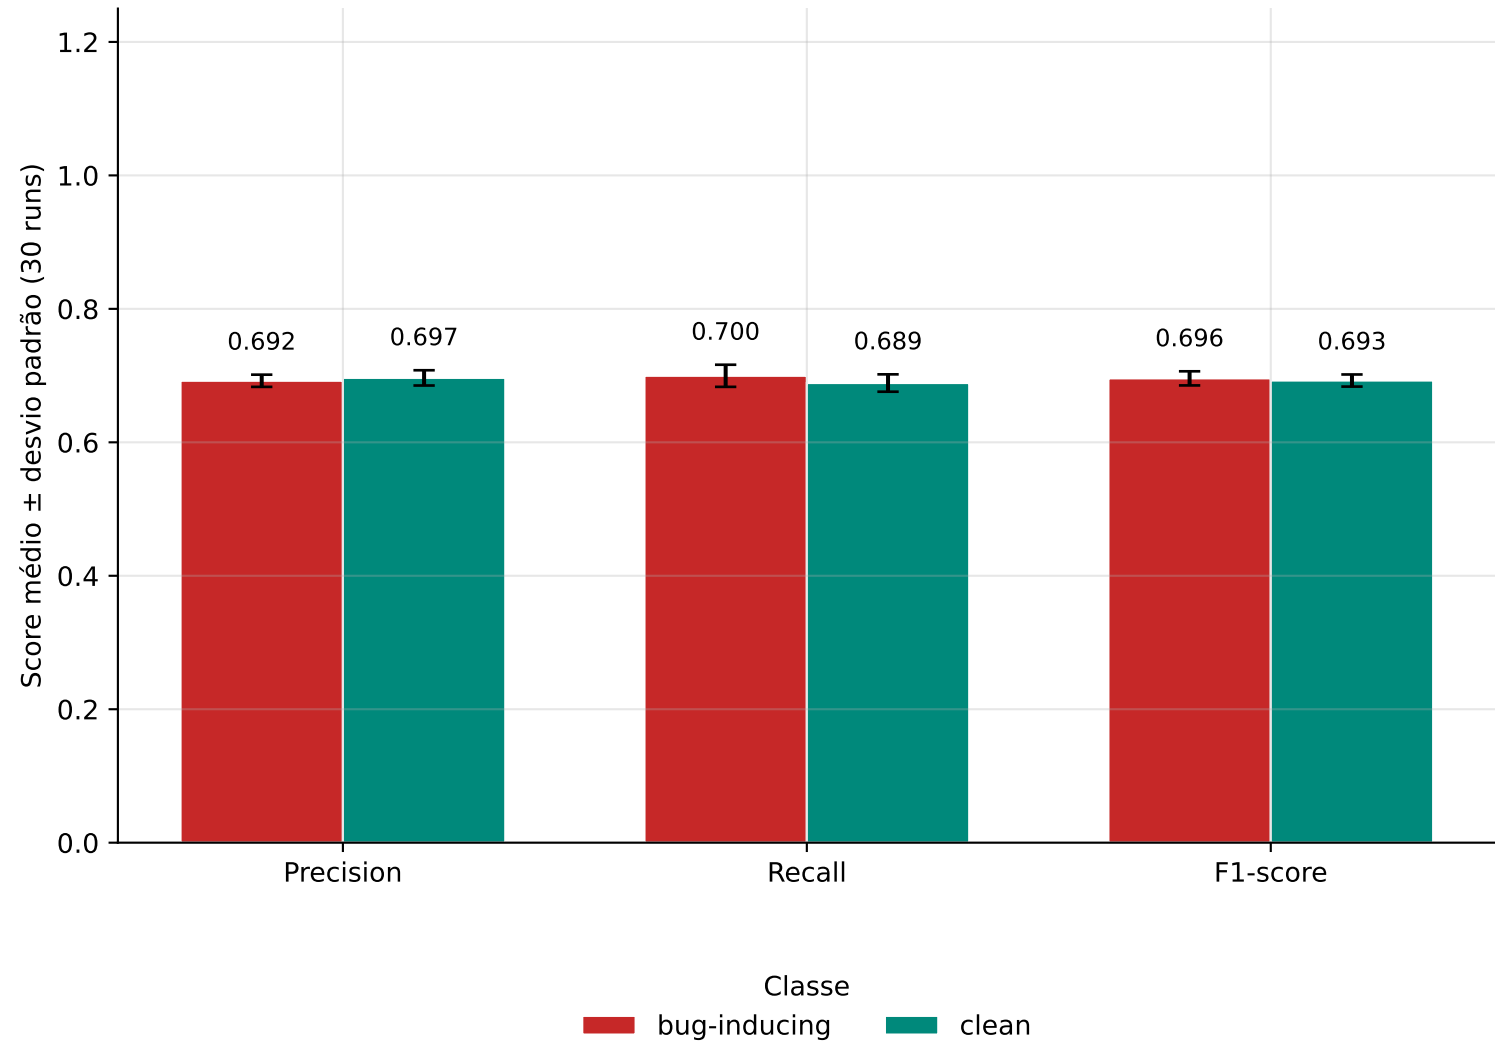

Distribuição por run (30 execuções) — Random Forest vs Logistic Regression

Random Forest — Bug-inducing vs Clean

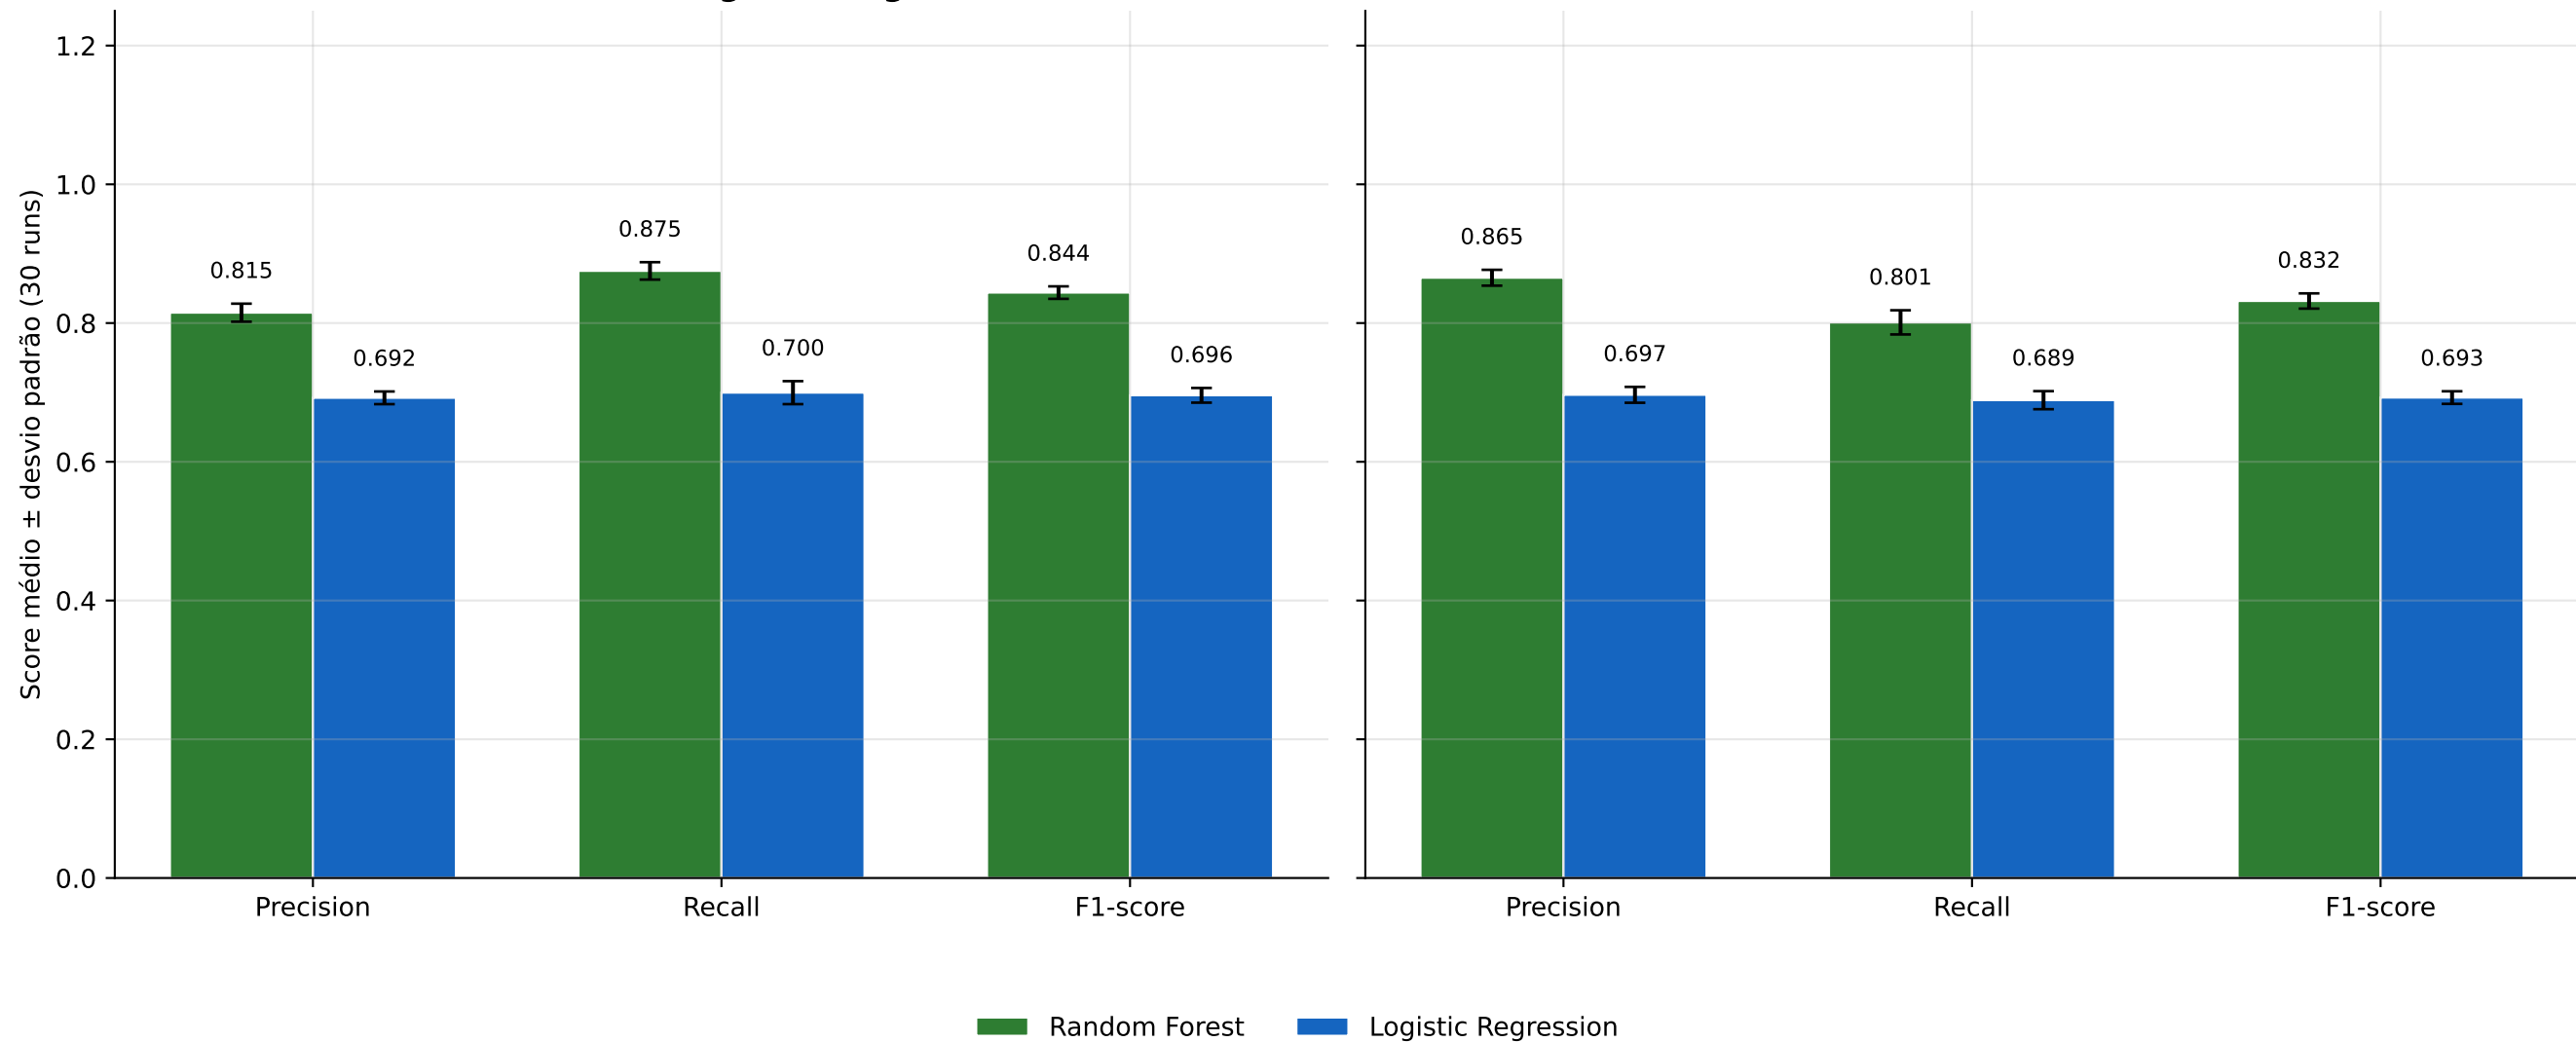

Logistic Regression — Bug-inducing vs Clean

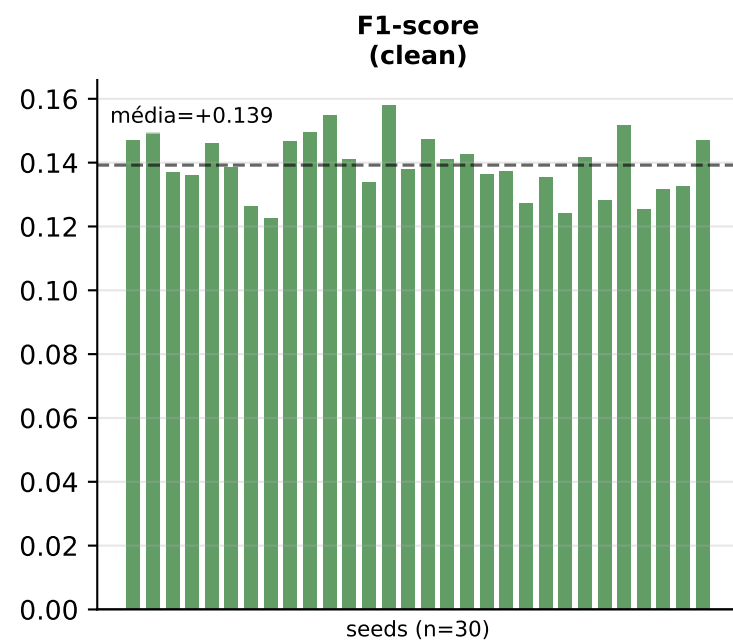

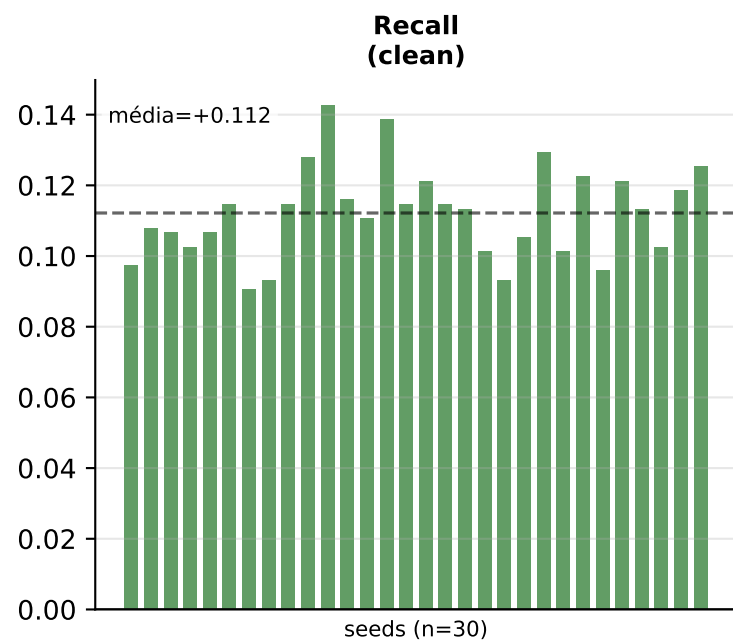

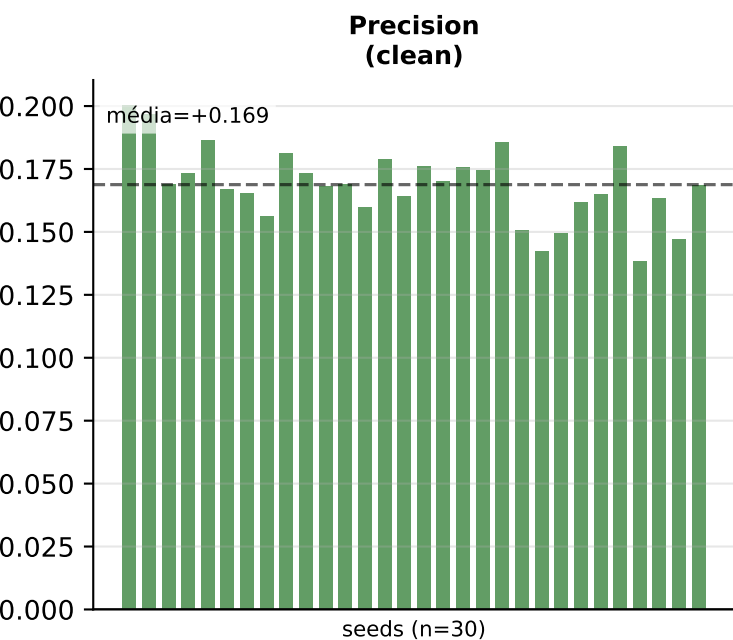

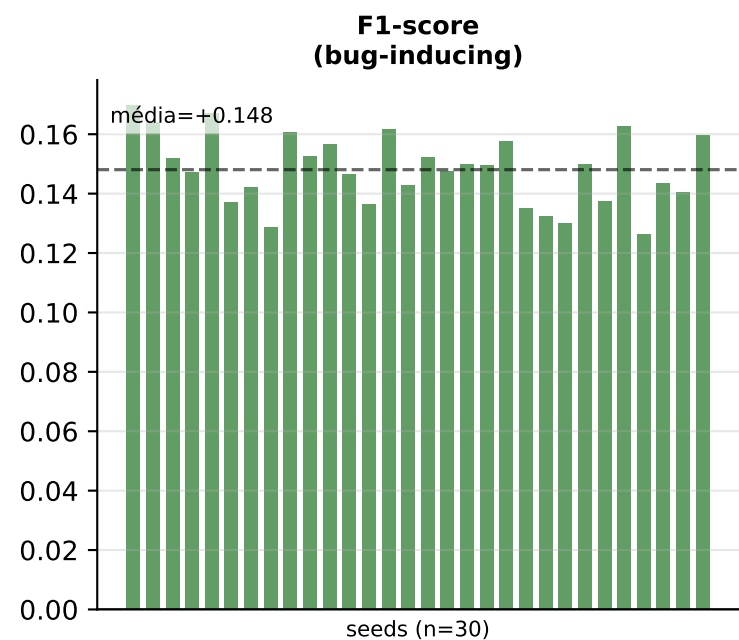

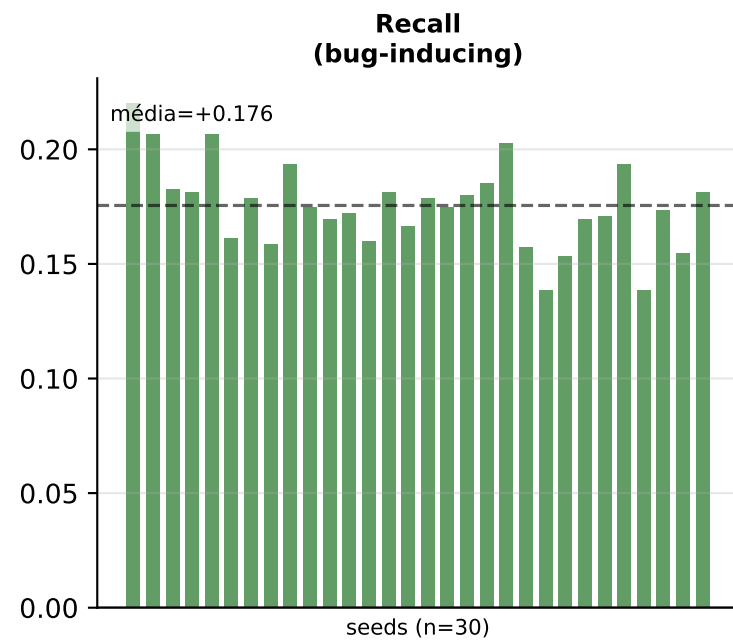

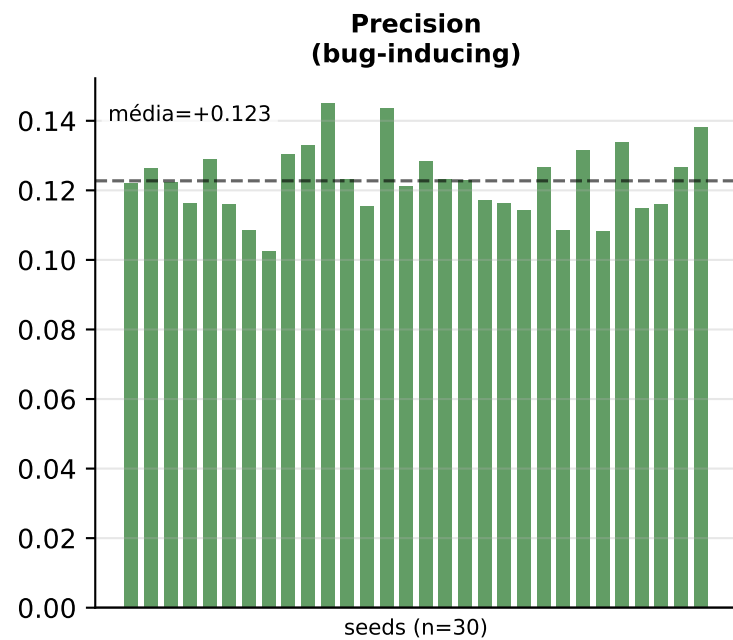

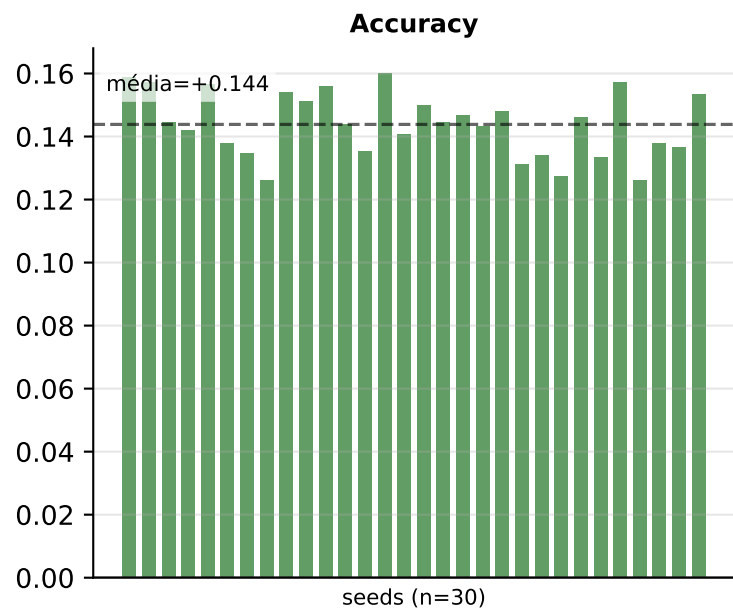

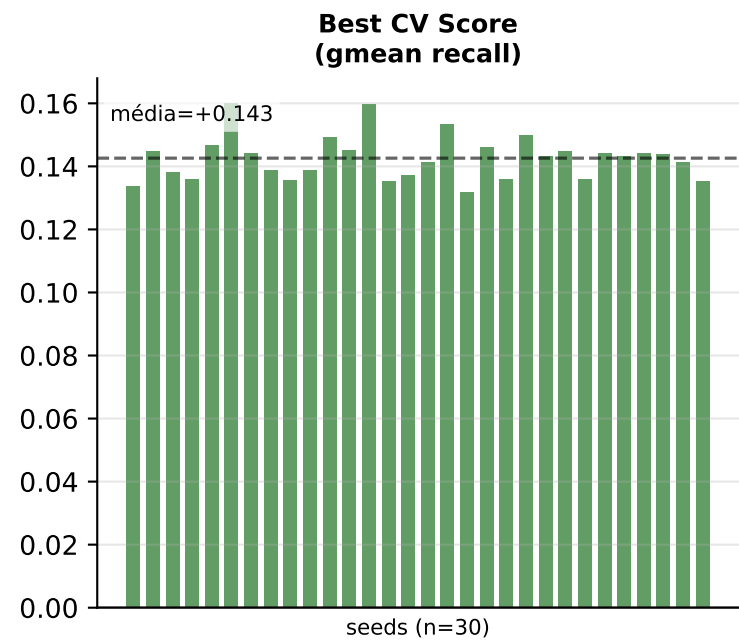

Comparação por classe — Random Forest vs Logistic Regression

Classe: bug-inducing

Classe: clean

Diferença pareada por seed: Random Forest – Logistic Regression
(barras verdes = RF melhor nesse seed; vermelhas = LR melhor)

Comparação geral (radar) — médias das 8 métricas

- Random Forest
- Logistic Regression
